- Saraswati Vidyalaya , Vasind, Maharashtra

Matriculation, X -69.00%   **2018 - 2019**
- G. D. K gurukul school , Vasind, Maharashtra

Projects

Sign Detector

Solo Project | React.js, TypeScript, Tailwind CSS, JavaScript, Node.js

- Designed and developed an assistive web application for deaf individuals that detects hand signs and converts them into spoken words in real time.
- Implemented real-time gesture recognition to identify specific finger placements corresponding to common signs such as "Thank you," "Hi," and "I love you."

AI-advisor

Solo Project | React.js, JavaScript, PostAPI, Firebase, GenkitAI.

- Developed a real-time AI-Advisor platform to help to improve the communication skills and boost confidence of the interviewer, where user can give unlimited mock interviews .
- Used BigQuery for analyzing the fumbling and nervousness. GenkitAI for chatBot, and Firebase for questions. So User will give interview with camera on and AI will detect the flaws and will give advice to fix wherever its needed.
